12th

Kendriya Vidyalaya No.2 Chennai

05/2016 – 05/2017

WORK EXPERIENCE

SDE Intern - Backend Developer

WTF - Digital Waiter

05/2020 – 07/2020

Remote

Responsibilities

- Designed and Developed Database Models.
- Made RESTful API's for large production Applications.
- Documented Architecture for all RESTful API's.

MAJOR PROJECTS

E-commerce Website (ReactJs)

- E-commerce application similar to Shopify using React, Redux, React Hooks, React Router, Firebase, Stripe, NodeJs, ExpressJs + more. This is a full-stack app (MERN stack), using Firebase.

Minute-News

- Minute-News App provides the latest India news from 1000+ most read & reliable sources from all across the world. You can even filter down the news to the hottest topics around the world. Stay updated with current news with the Minute-News App.

ICT Management Website

- Problem with KIIT ICT was that everyone's data was exposed as they used Excel sheets to manage, so I developed a website where only admins can access and manage user data and can send pickup message reminders. And students can fill the required form to register their complaint and can track their complaint status from anywhere.

Emoji Link Shortener

- A URL shortener is a simple tool that takes a long URL and turns it into a short and convenient URL. To make it more interesting, I added emoji flavour to my link shortener.

Weather App

- User Authenticates using Google Account and then the app automatically detects your user's location and uses API to fetch weather of that location.

ACHIEVEMENTS

HackerRank
